Professional Profile

Strategic Industrial Engineer and current **Master's candidate in Operations Management**. Proven expertise in data-driven process optimization, Lean methodologies, and cross-functional project execution to increase **throughput** and reduce operational costs. Leveraging **dual Norwegian - Peruvian national competence** and multilingual proficiency, I bring exceptional **cross-cultural adaptability** to drive operational excellence in high-volume.

Interpersonal Skills

- **Languages: Norwegian** (Native), **Spanish** (Native), **English** (C1).
- **Strategic & Analytical Thinking:** Highly structured and analytical, skilled in using data to diagnose systemic failures and implement effective solutions (Dive Deep).
- **Proactive Problem-Solving:** Driven by Bias for Action, I am creative in identifying opportunities and developing innovative, simplified operational solutions (Invent and Simplify).
- In**fluence & Negotiation:** Strong communication, negotiation, and cross-functional collaboration abilities for managing complex client/supplier relationships (Earn Trust).
- **Operational Ownership:** Flexible and adaptable, thriving in high-pressure environments with a strong sense of Ownership for global results and ongoing development.

Education

B.S. in Industrial Engineering & Management
Universidad Católica San Pablo

Master's in Operations Management (In progress)
Universidad Católica de Valencia | 2025 – 2026

Experience

Operations Internship – Continuous Improvement
Ardo | November 2025 – March | Valencia, Spain

Driving **TPM methodology** to standardize **packaging machinery,** simplify equipment setups, and define precise adjustment points for improved **efficiency**.
Managing operational **KPIs** (Efficiency, Productivity, Quality) using **SAP and MES systems** to monitor real-time data and resolve **production bottlenecks**.
Leading training and competency mapping for new lines, documenting standard operating procedures (**SOPs**), safety protocols, and **autonomous maintenance.**

Summer Job in Norway
Norwegian Air Ambulance Foundation | May-July 2025 |

Responsible for public outreach and member engagement, sharing the foundation's mission and encouraging community support through conversations in local neighborhoods.

Customer Support Specialist for Smart Vehicles
Volkswagen | 2024 | Athens, Greece

Technical support for customers regarding **digital vehicles**, encompassing the diagnosis and using **hardware engineering.**
Collaboration with interdisciplinary teams to **optimize** diagnostic **processes** and enhance communication between clients and workshops.

Environmental volunteerism
Arboriza21 |March 2024 - July 2024 | Remote

Administrative assistance for environmental initiatives and oversight of engineering students in the execution of the projects, including follow-up and evaluation.

Technical Proficiencies

- **Lean Six Sigma** (DMAIC)**, Advanced Excel** (Modeling/VBA)**, Statistical Software** (Minitab / RStudio)**, Power BI** (Data Visualization)**, ISO Quality Standards** (9001/14001)**, Process Modeling, Supply Chain Principles.**

Project Management and Customer Support:

- **Process Optimization & Time Analysis:** Led projects in **reducing cycle time** and resource management, resulting in measurable gains in production **throughpu**t (rendimiento) for manufacturing.
- **Continuous Improvement**: Applied **Lean principles** in cross-functional teams to identify and resolve **process bottlenecks** and streamline workflow.
- **Technical Diagnostics & Support:** Experience managing complex technical diagnostics and customer support for smart vehicles (Volkswagen).
- **Informal Project Leadership:** Managed student groups, overseeing resource allocation and delivery across multiple academic projects.

The Intersection of Engineering and Global Strategy

I am an Industrial Engineer with a dual Norwegian-Peruvian background, currently completing my **Master's in Operations Management in Valencia**. My professional identity is defined by a "data-first" mindset and a relentless drive for operational excellence. I specialize in bridging the gap between technical rigor and international commercial viability.

A Strategic Master's Thesis: Navigating Global Complexity Currently, I am developing a high-level **Capstone Project** that serves as a full-scale blueprint for an international venture. Without revealing the proprietary nature of the product, this project involves:

- **End-to-End Product Development:** From initial design to market-ready execution.
- **Intercontinental Logistics:** Solving the friction of cross-border trade and navigating the complexities of global supply chain networks.
- **Strategic Arbitrage:** Analyzing cost structures and value propositions between diverse international markets.

This project is not merely academic; it is a rigorous exercise in **risk management, cost engineering, and international scalability**.

The Human Side of the Engineer I believe that a well-rounded professional is a more effective leader. My personal interests are an extension of my professional discipline:

- **Strategic Precision:** On the **golf** course and in the **swimming** lane, I practice the patience and consistency required for long-term success.
- **Creative Discipline:** Playing the **piano** keeps my mind sharp, balancing mathematical structure with creative fluidity.
- **Collaborative Strategy:** Whether I'm cheering for **Liverpool FC** or engaging in complex **board games** with friends, I value the power of collective intelligence and the "Never Walk Alone" philosophy.
- **The Explorer's Mindset:** I find clarity and inspiration by **exploring the outdoors** and hiking through forests—environments that remind me of the importance of perspective and resilience.

Initiative and Growth I am a naturally curious individual who thrives on taking the initiative. I don't just look for a job; I look for a **mentorship environment** where I can absorb high-level knowledge, value diverse opinions, and extract the maximum potential from every challenge. I am ready to bring this proactive energy.
